## Pure EARTH Water

The Closest Thing to a  
Pure Mountain Spring on  
your Countertop!

Santevia™ recreates the Earth's perfect process of purifying, mineralizing, alkalizing and vitalizing water. Each drop of ordinary tap water is gravity dripped, resulting in long-contact exposure to earth-derived elements transforming it into the most vital and complete water anywhere.

BPA Free

### In the beginning

In nature, water was once purified through a process of evaporation and condensation, resulting in rainfall – then gravity-filtered through the Earth's crust becoming enriched with alkalizing minerals while being vitalized by the Earth's magnetic core. Eventually this organically complete water was distributed through clean running springs, rivers or wells. Exposure to the sun's light spectrum is also thought to elicit energizing potential.

### Modern Day Water Woes – Back to Nature Solution

Unfortunately few, if any, sources of true, organically complete water exist due to global contamination of ground water. Municipal water treatment, water filters, distilled water and bottled water - while arguably clean, do nothing to restore water's full organic potential. Santevia is the first to re-create Pure EARTH Water.

### MORE Than a Water Filter:

**P** While water filtration is important to yield clean, contaminant reduced water – it is merely one element of organically complete water. Unlike many high-tech water filters, Santevia™ cleans your water without using chemicals, artificial filter media, water pressure, or electricity. Santevia™ uses all-natural and effective compounds such as earthenware ceramic, coconut carbon charcoal, volcanic Zeolite, and silica sand.

**U**

**R**

**E** Once sparkling clean the real magic of transforming your water begins.

Countertop Model

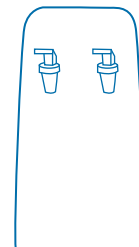

**E** **NERGIZES:** Water is re-energized with bio-ceramic, which like the sun, emits the invisible yet beneficial far-infrared light spectrum. Magnets in the dispenser spout simulate the magnetism of the Earth's core, thought to re-structure water for better bio-availability.

**A** **LKANIZES:** Bitter and acidic tap-water is transformed into terrific tasting and healthful alkaline water through contact with natural silica sand and mineral dense Maifan stone. Water pH is increased by as much as 100%!

**R** **E-MINERALIZES:** Mineral dense Maifan stones infuse highly beneficial and absorbable calcium, iron, magnesium, potassium, zinc and other trace minerals back into the water.

**T** **ASTES GREAT:** Pure and naturally re-mineralized, alkaline and revitalized Santevia water is brilliant in clarity, mountain spring fresh with a sweet and smooth flavor unique to Pure EARTH Water.

**H** **YDRATES:** Alkaline and mineralized water refreshes and revitalizes your body. Bio-ceramic energy balls and aligned magnets serve to re-structure, and cluster water molecules for optimal absorption and hydration.

Dispenser Model

(base not included)

## THE 8 STAGE SANTEVIA™ PURE EARTH WATER SYSTEM

CERAMIC STONE PRE-FILTER  
Last 1 year with normal use.

5 STAGE ULTRASONIC FILTER  
Lasts 4 – 6 months.

MINERAL STONE IMMERSION  
Lasts up to 5 years.

### STAGE 1 – Earthenware Ceramic Stone Pre-filter

- Constructed from highly compressed and fired diatomaceous earth.
- Pore size of 0.3 of a micron.
- Removes rust and sediments.
- Stops bacteria, germs and parasites.

### STAGE 2 – Activated Coconut Carbon Charcoal

- Highly porous coconut carbon charcoal with an astounding 65 acres of purifying surface area.
- Removes chlorine, herbicides, pesticides, pharmaceuticals, industrial chemicals Trihalomethanes (THMs), heavy metals, organic chemicals, odor, color and particulates.
- Contains KDF filter medium that inhibits the growth of bacteria in the filter.

### STAGE 3 – Natural Silica Sand

- Provides additional filtration.
- Creates optimal pH balance by neutralizing acidic components in input water.
- “Polishes” water for brilliant clarity and sparkle.
- Infuses water with natural silica – popular for strengthening collagen for radiant skin, hair and nails.

### STAGE 4 – Volcanic Mineral Zeolite Granules

- Inhibits bacteria.
- Neutralize heavy metals including lead, nickel, cadmium and mercury through an ion exchange process.
- Removes detergents, ammonium, certain radioactive ions, agricultural chemicals and other toxins.

### STAGE 5 – Mineral Stone Infusion

- Highly porous Maifan stones aid in the oxygenation of water and in the adjustment of the water to mild alkaline.
- Ionized minerals help oxygenate and fortify water.

### STAGE 6 – Bio-Ceramic Energy Balls

- Constructed from highly compressed and fired diatomaceous earth and mineral oxides.
- Assists in pH balancing.
- Breaks water molecules clusters into smaller structures for greater bio-availability.
- Emits beneficial infrared to energize the water.

### STAGE 7 – Mineral Stone Immersion

- The mineral stones contain calcium, iron, magnesium, potassium, zinc and other trace minerals.
- Continually releases easily absorbed ionized minerals.
- The mineral stones will last up to 5 years gradually diminishing in size.
- World Health Organization recommends drinking water with calcium, copper, iron, magnesium, manganese, sodium, potassium and zinc. Santevia water contains all of these minerals.

### STAGE 8 – Magnetic Energy

- Aligned magnets are suspended in water, embedded in the Santevia water spout.
- Simulates magnetism emitted by the Earth’s core and the forces created as water flows over and through rocks containing magnetic minerals as found in nature.
- Activates and energizes water molecules, reorganizing them into simpler structures for maximum absorption.

#### THE IMPORTANCE OF HEALTHY PH

Alkaline water can help neutralize over-acidity in the body caused by stress, modern diet, air pollution, and acidic bottled water. The Santevia™ Pure EARTH Water System utilizes all-natural mineral stones to normalize the pH of water to mildly alkaline - thus creating healing, restorative water that both hydrates and balances your body's pH for optimum health and vitality.
